

ANDREAS GARCIA

Full-Stack Developer | Music Technology Innovator | Open Source Contributor

ABOUT

Full-stack engineer passionate about building products that reach large audiences, with experience in **React** and **Next.js**. I founded and lead all the developments of BehindTheMusicTree, an open-source music technology ecosystem including AudioMeta Python with **10 000+ downloads**.

BehindTheMusicTree includes GrowTheMusicTree for collaborative **genre classification** which feeds TheMusicTreeAPI, and HearTheMusicTree for **cloud-based music library management**. Each project demonstrates commitment to building tools with deep passion for music.

SKILLS

- **Technical:** React, Next.js, TypeScript, JavaScript, PostgreSQL, Django REST Framework, Python
- **Workflow:** GitFlow, Test Driven Development, CI/CD, Agile/SCRUM, Clean Code, API Design, Docker
- **Languages:** French (native), **English (fluent)**, Spanish (fluent), German (basics)
- **Interests:** Sustainable farming (WOOOFing), eco-construction, micro music festival organizer

PROFESSIONAL EXPERIENCE

BehindTheMusicTree - Opensource Developer Sept 2022 - Present | Paris, France

- Developed GrowTheMusicTree using **Next.js, TypeScript, and React**, building collaborative platform.
- Implemented TheMusicTreeAPI using Django REST Framework and **PostgreSQL**, providing genre hierarchy.
- Created AudioMeta Python library achieving **10 000+ downloads**, with suite of 1500+ tests.
- Developed HearTheMusicTree for cloud-based music library management with smart playlists.

Shotgun - Consultant (Not under contract) Dec. 2024 – Jan. 2025 | Paris, France

- Organized and **classified 1300+ music genres** from Soundcharts for user-concert matching tool, mapping raw genre labels into structured taxonomy and fixing Soundcharts inconsistency.
- Combined domain expertise in **music history** and audio analysis to ensure meaningful genre grouping, focused on the user experience.

INRAE - Research Engineer Oct. 2018 – Dec. 2019 | Montpellier, France

- Implemented **REST API services** in Java using Data Transfer Object pattern for event handling.
- Added event handling in JavaScript on website layer using three-tier architecture and API calls.
- Manipulated complex data structures in RDF4J graph database and **improved ontologies to support research**.

EDUCATION

La Ruche - Programme Itinéraire (Entrepreneurship Program, 2025) 2025

INSA Lyon - Engineering degree in Computer Science (2014) 2014
